Description

These units are designed for drilling aluminium, PVC, various types of wood and thin sheet metal. The unit consists of a slide and a pneumatic motor. Slides are available in three stroke lengths: 25, 50 and 100 mm. Slides can be fitted with a selection of pneumatic motors with three power ratings: 190, 430 and 480 Watt. Modular units can be fi tted with and end-ofstroke sensor controlled by pneumatic circuits or a PLC. Speed decelerators and pneumatic
control circuits for driving one or more units are also available on request.
